ELSEVIER International Journal of Mass Spectrometry and Ion Processes 162 (1997) 205–207

International Journal of Mass Spectrometry and Ion Processes

Subject index

Alkali metal
Metal–ligand redox reactions in gas-phase quaternary peptide–metal complexes by electrospray ionization mass spectrometry 77
Alkaline earth colloids
Gas phase salt clusters from electrosprayed alkaline earth colloids 107

Biomolecules
Sensitivity enhancement of electrospray ionization–MS for aqueous solutions in the corona-assisted cone-jet mode 69

Co-ordination
Multiple neutral alkali halide attachments onto oligosaccharides in electrospray ionization mass spectrometry 45
Collisional activation
Intra-ionic interactions in electrosprayed peptide ions 149
Computer modeling
Multiple neutral alkali halide attachments onto oligosaccharides in electrospray ionization mass spectrometry 45
Cone-jet
Sensitivity enhancement of electrospray ionization–MS for aqueous solutions in the corona-assisted cone-jet mode 69
Conformation
Intra-ionic interactions in electrosprayed peptide ions 149
Corona
Sensitivity enhancement of electrospray ionization–MS for aqueous solutions in the corona-assisted cone-jet mode 69
Cytosine
Electrospray ionization mass spectrometry of RNA nucleobases: implications for solution chemistry and ion source operating conditions 163

Denaturation
Do proteins denature during droplet evolution in electrospray ionization? 173

Diode array detector
Changes in bulk solution pH caused by the inherent controlled-current electrolytic process of an electrospray ion source 55
Doubly charged ions
Gas phase reactions of doubly charged alkaline earth and transition metal(II)-ligand complexes generated by electrospray ionization 17
Droplet evolution
Do proteins denature during droplet evolution in electrospray ionization? 173

Electrochemistry
Changes in bulk solution pH caused by the inherent controlled-current electrolytic process of an electrospray ion source 55
Electron affinity
Metal–ligand redox reactions in gas-phase quaternary peptide–metal complexes by electrospray ionization mass spectrometry 77
Electron transfer
Gas phase reactions of doubly charged alkaline earth and transition metal(II)-ligand complexes generated by electrospray ionization 17
Electrospray
Adaptation of the Paul Trap for study of the reaction of multiply charged cations with singly charged anions 89
An extended mass range quadrupole for electrospray mass spectrometry 121
Changes in bulk solution pH caused by the inherent controlled-current electrolytic process of an electrospray ion source 55
Electrospray ionization mass spectrometry of RNA nucleobases: implications for solution chemistry and ion source operating conditions 163
Intra-ionic interactions in electrosprayed peptide ions 149
Multiple neutral alkali halide attachments onto oligosaccharides in electrospray ionization mass spectrometry 45
Trimethylsilyl derivatization of nucleic acid anions in the gas phase 183

Electrospray ionization
Do proteins denature during droplet evolution in electrospray ionization? 173
Metal–ligand redox reactions in gas-phase quaternary peptide–metal complexes by electrospray ionization mass spectrometry 77
Sensitivity enhancement of electrospray ionization–MS for aqueous solutions in the corona-assisted cone-jet mode 69

Fragmentation
Electrospray ionization mass spectrometry of RNA nucleobases: implications for solution chemistry and ion source operating conditions 163

Gas phase salt clusters
Gas phase salt clusters from electrosprayed alkaline earth colloids 107
Gas-phase redox reaction
Metal–ligand redox reactions in gas-phase quaternary peptide–metal complexes by electrospray ionization mass spectrometry 77
Glow discharge
Adaptation of the Paul Trap for study of the reaction of multiply charged cations with singly charged anions 89

High Mass
An extended mass range quadrupole for electrospray mass spectrometry 121

Ion trap
Trimethylsilyl derivatization of nucleic acid anions in the gas phase 183
Ion-ion reactions
Adaptation of the Paul Trap for study of the reaction of multiply charged cations with singly charged anions 89

Low energy collision induced dissociation
Gas phase reactions of doubly charged alkaline earth and transition metal(II)-ligand complexes generated by electrospray ionization 17

Mass spectrometry
Electrospray ionization mass spectrometry of RNA nucleobases: implications for solution chemistry and ion source operating conditions 163
Multiple neutral alkali halide attachments onto oligosaccharides in electrospray ionization mass spectrometry 45
Metal(II)-complexes
Gas phase reactions of doubly charged alkaline earth and transition metal(II)-ligand complexes generated by electrospray ionization 17
Multiply charged ions
Adaptation of the Paul Trap for study of the reaction of multiply charged cations with singly charged anions 89
Multiply-charged anion
Charge state effects in the decompositions of single-nucleobase oligonucleotide polyanions 1

Non-covalent complexes
An extended mass range quadrupole for electrospray mass spectrometry 121
Nucleic acid anions
Trimethylsilyl derivatization of nucleic acid anions in the gas phase 183
Nucleobase
Electrospray ionization mass spectrometry of RNA nucleobases: implications for solution chemistry and ion source operating conditions 163

Oligonucleotide
Charge state effects in the decompositions of single-nucleobase oligonucleotide polyanions 1
Oligosaccharides
Multiple neutral alkali halide attachments onto oligosaccharides in electrospray ionization mass spectrometry 45

Peptide–copper complex
Metal–ligand redox reactions in gas-phase quaternary peptide–metal complexes by electrospray ionization mass spectrometry 77
Peptides
Intra-ionic interactions in electrosprayed peptide ions 149
pH
Changes in bulk solution pH caused by the inherent controlled-current electrolytic process of an electrospray ion source 55
Protein
Do proteins denature during droplet evolution in electrospray ionization? 173
Proton transfer
Gas phase reactions of doubly charged alkaline earth and transition metal(II)-ligand complexes generated by electrospray ionization 17

Quadrupole ion trap
Adaptation of the Paul Trap for study of the reaction of multiply charged cations with singly charged anions 89

Charge state effects in the decompositions of single-nucleobase oligonucleotide polyanions 1
Quadrupole mass spectrometer
An extended mass range quadrupole for electrospray mass spectrometry 121

Reduction
Gas phase reactions of doubly charged alkaline earth and transition metal(II)-ligand complexes generated by electrospray ionization 17

Sensitivity
Sensitivity enhancement of electrospray ionization–MS for aqueous solutions in the corona-assisted cone-jet mode 69

Tandem MS
Intra-ionic interactions in electrosprayed peptide ions 149
Trimethylsilyl chloride
Trimethylsilyl derivatization of nucleic acid anions in the gas phase 183

Water oxidation
Changes in bulk solution pH caused by the inherent controlled-current electrolytic process of an electrospray ion source 55
